Open to relocation • EU work sponsorship welcome

## PROFESSIONAL SUMMARY

Full-stack engineer with 7+ years of experience building scalable backend systems and leading engineering teams at startups and agencies. At Dorik, architected and shipped multiple production applications — including Consently.net (600+ lifetime licenses sold) and Postmonk.co (built solo, end-to-end) — while managing cloud infrastructure and a backend engineering team serving 100k+ users. Strong technical ownership and a track record of delivering high-impact products remotely.

## PROFESSIONAL EXPERIENCE

### Lead Software Engineer — Dorik

Apr 2025 – Present

Sylhet, Bangladesh

- Built Postmonk.co end-to-end (launched Q2 2026) — a full-stack social media scheduling application — from architecture through deployment, as sole engineer. Integrated 5+ social platform APIs (Facebook, Instagram, X, LinkedIn, YouTube) with queue-based scheduling powered by BullMQ and Redis.
- Lead and manage the backend engineering team — hiring, mentorship, task planning, and performance oversight for a team of 4+ engineers.
- Manage deployments of all Dorik services across cloud infrastructure (AWS ECS, EC2, Lambda), serving 100k+ users across Dorik's product suite.
- Define and enforce engineering standards: code reviews, architecture decisions, and cross-team technical alignment.
- Own infrastructure provisioning and scaling with Terraform; oversee CI/CD pipelines and operational reliability with 99.9%+ uptime.

**Technologies:** Node.js, Express.js, MongoDB, GraphQL, BullMQ, RabbitMQ, Redis, Terraform, AWS (ECS, EC2, Lambda), Docker, CI/CD

### Senior Software Engineer (Backend) — Dorik

Jan 2023 – Apr 2025

Sylhet, Bangladesh

- Architected and delivered Consently.net (Q3 2024) — a consent management platform — owning the entire backend: API design, data modelling, GDPR/ePrivacy compliance workflows, and infrastructure.
- Launched on AppSumo in Jan 2026; sold 600+ lifetime licenses within months. Platform now serves 920+ clients across 894 domains, processing 672K+ monthly consents across 11M+ monthly pageviews with 99.99% uptime.
- Designed and implemented complex, high-performance backend systems handling compliance workflows; established patterns adopted across the engineering team.
- Conducted thorough code reviews and provided technical mentorship to junior and mid-level engineers.

**Technologies:** Node.js, Express.js, MongoDB, GraphQL, BullMQ, RabbitMQ, Redis, Terraform, AWS

### Lead Front-end Developer — Relantin

Nov 2021 – Oct 2022

Remote

- Managed task assignment and pull request reviews for a team of 3+ developers, ensuring code quality and alignment with project goals.
- Structured frontend architecture and implemented state management solutions to optimise performance and scalability across multiple client projects.
- Planned, scheduled, and prioritised tasks to minimise bottlenecks and ensure smooth delivery across the full project lifecycle.

**Technologies:** Vue.js, Nuxt.js, React, Next.js, TypeScript, SolidJS

### Front-end Developer — Rootsoft IT

Feb 2021 – Oct 2021

Sylhet, Bangladesh

- Collaborated with cross-functional teams to design and develop web applications aligned with business requirements.
- Built reusable, modular components; integrated REST APIs and delivered core features for production applications.

- Optimised application performance using Nuxt.js server-side rendering (SSR), improving page load times by 40%+.

*Technologies: Vue.js, Nuxt.js*

## Co-Founder & Software Engineer — HuddleByte

Sep 2019 – Mar 2020

*Sylhet, Bangladesh*

- Co-founded a digital agency delivering end-to-end web solutions for startups and SMEs; handled technical, operational, and client-facing responsibilities.
- Full-stack engineer across 10+ client projects from concept to deployment, mentoring a team of 2–3 developers.

## TECHNICAL SKILLS

---

**Backend:** Node.js, Express.js, TypeScript, REST API Design, GraphQL, Microservices, BullMQ, RabbitMQ, MongoDB, Redis, PostgreSQL

**Frontend:** JavaScript, TypeScript, Vue.js, Nuxt.js, React, Next.js, SolidJS, Vuetify, Vuex / Pinia / Redux

**DevOps & Cloud:** AWS (ECS, EC2, Lambda), Terraform, Docker, CI/CD Pipelines, Infrastructure as Code

**Practices:** System Design, Code Review, Team Leadership, Agile, Deployment Management, Mentoring

## KEY PROJECTS

---

### Consently.net — Consent Management Platform

*Dorik • Q3 2024 • Sole Backend Engineer*

- Designed and built the full backend from scratch — API architecture, data models, GDPR/ePrivacy compliance workflows, background job processing with BullMQ, and AWS infrastructure provisioned with Terraform.

*Technologies: Node.js, Express.js, MongoDB, BullMQ, Redis, AWS ECS, Terraform*

### Postmonk.co — Social Media Scheduling App

*Dorik • Q2 2026 • Sole Engineer (Full-Stack)*

- Built end-to-end — frontend and backend — from architecture through deployment as the sole engineer. Integrated 5+ social platform APIs with queue-based scheduling powered by BullMQ and Redis.

*Technologies: Node.js, MongoDB, Redis, BullMQ, Vue.js / Nuxt.js*

### Feevox.com — Customer Feedback & Product Roadmap Tool

*Solo Project*

- Full-stack SaaS for product teams: idea collection, community voting, public roadmaps, and changelogs. Features embeddable widget, ClickUp integration, webhooks, custom domains, and multi-tier billing (Free / Pro / Team at \$9–\$29/mo).

*Technologies: Node.js, Vue.js / Nuxt.js, MongoDB, Redis, Stripe*

## EDUCATION

---

### Bachelor of Science in Computer Science and Engineering

2014 – 2018

*Leading University — Sylhet, Bangladesh*

**Coursework:** Data Structures & Algorithms, OOP, Computer Architecture, Operating Systems, AI, Networking
